

# AVIATION

**Suiting All Sizes**

# Common Building Types

---

## Apex

**Available from 53' - 100' Wide**

The Apex Building Series maximizes interior usable space thanks to its tall side walls. The slightly curved roof profile, sharp peak and standard sidewall legs give the Apex style and character, without sacrificing functionality.

## Genesis

**Available from 80' - 200' Wide**

The Genesis Building Series is well suited to a variety of commercial and industrial applications, including salt and sand storage buildings, manufacturing facilities, warehousing, dairy barns and equine riding arenas. With a clear span interior, Genesis buildings offer a large amount of covered but unobstructed space for your operations.

## Rigid Beam

**Available from 200' - 300' Wide**

The Rigid Beam Series is an I-beam style truss building that is completely customizable and allows for structures up to 300' wide, with open sides. It is optimal for buildings larger than 200' wide, including large aircraft hangars, tall seed cleaning plants, indoor recreation facilities, any buildings that requires gantry cranes and more.

# The Ideal Choice

## Ground Support Shelters

Large spaces for any aircraft need. Offering customized door styles and sizes for optimal access points and controlled features.

## Airplane & Helicopter Hangars

Safely storing aircrafts of all sizes and forms to protect these high-cost assets.

## Aircraft Maintenance

Ensuring there is the necessary space to perform any work on aircrafts in-shop. Our indoor facilities allow for year-round maintenance possibilities.

# Benefits

## Low Operational Costs

Our structures require a low-cost investment compared to traditional buildings, and lower operational needs to save you money.

## Superior Engineering

As an industry leader, we use cutting edge technology to engineer your building to your exact site loads, location, and application.

## Safety First

Keep your employees safe while they work in our completely engineered structures.

# Customization Options

- Add large sliding doors to accommodate for wingspans of aircrafts
- Insert controlled features such including heating, lighting, insulation, and ventilation
- Install portable structures in remote locations for aircraft travels
- Expand heights or have multiple leg heights to work with foundation of choice
