Common Building Types

Atlas

Available from 24' - 108' Wide

The Atlas Building Series defines the traditional look of fabric covered buildings. Popular applications include barns, implement and equipment storage, commercial warehouses and storage buildings.

Genesis

Available from 80' - 200' Wide

The Genesis Building Series is well suited to a variety of commercial and industrial applications, including salt and sand storage buildings, manufacturing facilities, warehousing, dairy barns and equine riding arenas. With a clear span interior, Genesis buildings offer a large amount of covered but unobstructed space for your operations.

Epic

Available from 80' - 120' Wide

The Epic Building Series has the look of a traditional building and all the benefits of a fabric building: natural light, superior ventilation, and no interior columns. A popular style for dairy buildings, the Epic's straight wall design offers flexibility of door locations and sidewall features.

The Ideal Choice

Hockey Rinks

A fabric structure is perfect for a hockey rink, whether you want to cover your outdoor rink or construct an arena.

Courts and Fields

The possibilities for our fabric structures are endless — tennis, basketball, volleyball, batting cages, and more!

Gymnasiums

Place treadmills or weight equipment, convert it into an indoor track, or set up a gymnastics or yoga studio with this wide exterior.

Benefits

Spacious Interiors

No internal posts means you can maximize your area of up to 300 feet wide as a welcoming environment.

Right Price

With a price that rivals traditional recreational buildings, you can afford to invest in a building with low operating costs.

Safety First

With a fully engineered fabric building, your patrons are safe while at play in your reliable structure.

Customization Options

- Design mezzanine floor for overhead viewing area for fans
- Add controlled features including heating, lighting, insulation, and ventilation
- Insert customized windows for added natural light
- Install an interior vapour barrier to reduce moisture throughout entire building
