# WAREHOUSES

**A strong, long-term building solution.**

# Common Building Types

---

## Atlas

**Available from 24' - 108' Wide**

The Atlas Building Series defines the traditional look of fabric covered buildings. Popular applications include barns, implement and equipment storage, commercial warehouses and storage buildings.

## Apex

**Available from 53' - 100' Wide**

The Apex Building Series maximizes interior usable space thanks to its tall side walls. The slightly curved roof profile, sharp peak and standard sidewall legs give the Apex style and character, without sacrificing functionality.

## Genesis

**Available from 80' - 200' Wide**

The Genesis Building Series is well suited to a variety of commercial and industrial applications, including salt and sand storage buildings, manufacturing facilities, warehousing, dairy barns and equine riding arenas. With a clear span interior, Genesis buildings offer a large amount of covered but unobstructed space for your operations.

# The Ideal Choice

## Maintenance Facilities

Permanent fabric building allows ample room to conduct maintenance work. Tools and equipment are completely covered and secured from outside elements.

## Vehicle & Equipment Storage

Spacious enough for large machinery and vehicles. Eliminate exposure to weather conditions, rust, dirt and overall deterioration when vehicles are stored.

## Portable & Temporary Workshops

On-site storage to protect store merchandise, materials and other equipment. Our portable and temporary structures provide enough room to use as a warehouse or a workshop.

## Benefits

### Safety First

Keep your employees safe while they work in our fully engineered structures.

### Return on Investment

Our structures require a low-cost investment compared to traditional buildings, and lower operational needs to save you money.

### Superior Engineering

As an industry leader, we use cutting edge technology to engineer your building to your exact site loads, location, and application.

# Customization Options

- Insulated and cold warehouse storage solutions for quick, safe, and easy installation.
- Free-span webbed truss building with a fabric cover for maximum storage space.
- Built up to 300 feet wide to allow employees to operate forklifts and other machinery.
- Rugged fabric buildings constructed with durable, hot-dip galvanized steel trusses.
